Attollo (Latin: Rise Up) is a forward-thinking, yet historically informed organization that unifies high school students from all backgrounds to build a pipeline of diverse leaders. Through educational empowerment, we aim to play our part in ensuring a world whose fabric has been rewoven with threads of equity and inclusion.

Our mission is to support success-oriented students from diverse backgrounds in their pursuit of academic achievement, empowerment and social engagement

Our Pillars: At Attollo, we are guided by our six pillars. During the six-week Attollo Recruit Program, students learn one pillar each week through various activities, reflection sessions, and discussions. These pillars of success are incorporated in all programming that is offered to scholars.

Strong Mind

Being open to taking on difficult challenges and solving tough problems

Competition

The act of trying to win

Resiliency

Bouncing back from setbacks

Accountability

Knowing that my actions not only affect me but others as well

Sacrifice

Giving up something now to get something better in the future

Finish Strong

Completing one's plan with intensity and pride

I AM MORE.

STUDENTS OF COLOR

55%

Of the students we surveyed, 55% identify as students of color, 78% as low to middle-income, and 42% as first-generation college students. As a college access program, we aim to work with students who will encounter hurdles in their higher education journey. Our job is to ensure they do not turn away from new opportunities when racism, sexism, classism, elitism, or other hurtful institutional norms stand in their way.

RECRUIT

*Strongmind
Competition
Resiliency
Accountability
Sacrifice
Finish Strong*

Attollo Recruit is our 5:30 AM onboarding process, which is an intensive 6-week course that begins at 5:30 AM. We partner with school districts who recruit a diverse cohort of high school juniors to be part of the program.

During the six weeks of Attollo Recruit, potential scholars experience the meaning of our pillars: Strong Mind, Competition, Resiliency, Accountability, Sacrifice, and Finish Strong. Students are able to take time of radical self-inquiry, as well as have the opportunity to learn how to solve the Rubik's cube in less than 90 seconds.

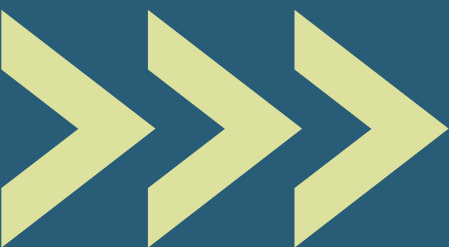

JUNIOR YEAR

COLLEGE PREP & CAREER READINESS

Upon completion of the Recruit program, scholars have access to a suite of exploratory and college-prep programs: Attollo Coding, Attollo Studios, Attollo Medicine, Attollo Start-Up, and SAT Prep.

In these courses, our facilitators incorporate college-level materials and allow scholars to explore their career through internships and professional development projects

YEAR ROUND SAT

The Attollo SAT program is designed to ensure that our scholars reach their full potential. Our goal is for no scholar to score under 1000 points on the test and for every scholar to experience a one hundred point increase from their base scores. To achieve this goal we offer programs that provide subject tutoring, test strategies, and practice exams. We want all of our scholars to attend the school of their dreams and a high SAT score is an essential part of the plan.

ATTOLLO ENGINEERING

Our Attollo Engineering and Code program aims to increase access and exposure to the STEM field and provide opportunities to a diverse group of students.

ATTOLLO PRE-MED

Pre-Med is focused on exposure and inspiration for future healthcare workers. Local health professionals from various fields are recruited to teach as mentors. Each AMed Scholar will have one 4+ hour shadowing experience with a clinician of their choice. Students will present a career action plan developed under the guidance of their professional mentor.

ATTOLLO STUDIOS

Our creative program aims to help our students practice telling their stories through creative problem-solving while preparing a compelling portfolio for their college applications. Not only are we focusing on creating content, but we will also focus on professional practices and presentation skills.

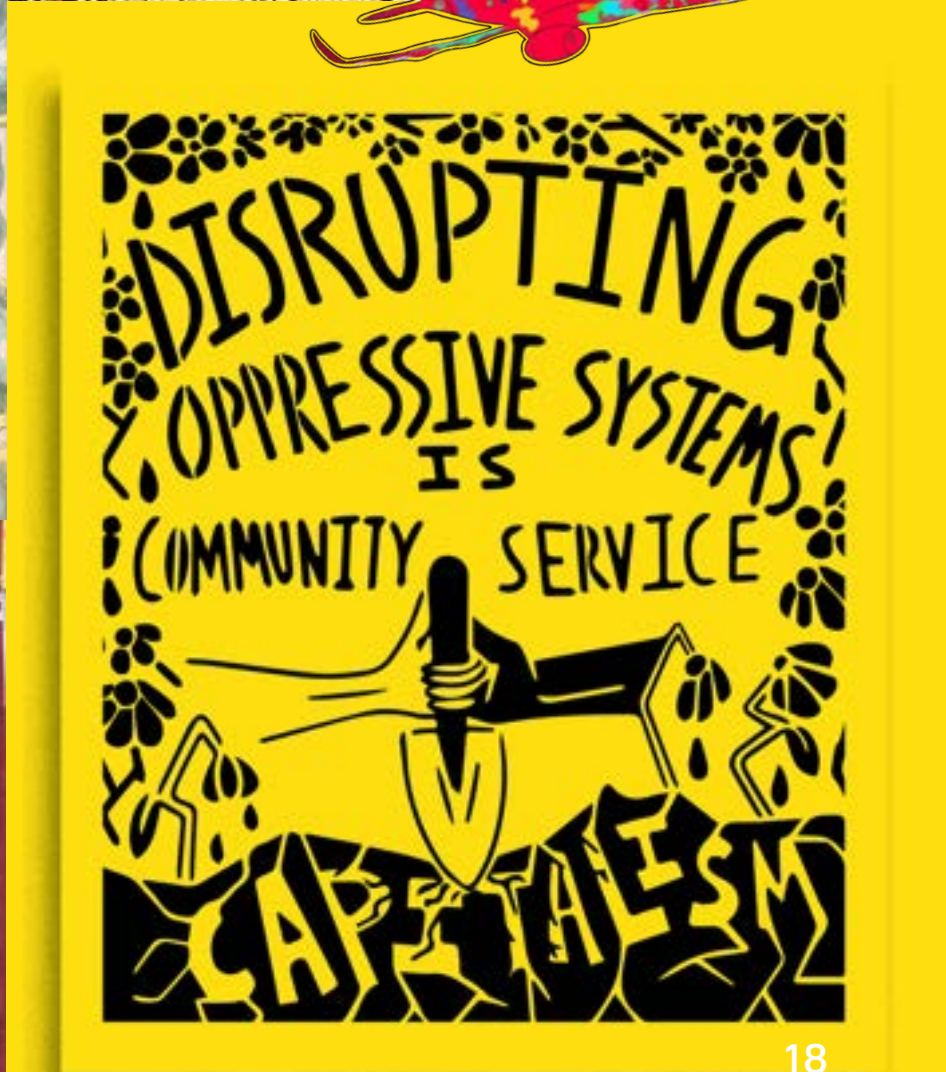

ATTOLLO STARTUP

Attollo Startup is an Entrepreneurial focused program in which students learn how to identify a problem, ideate to create a solution, develop the solution, present the solution (product) to investors, and market the product.

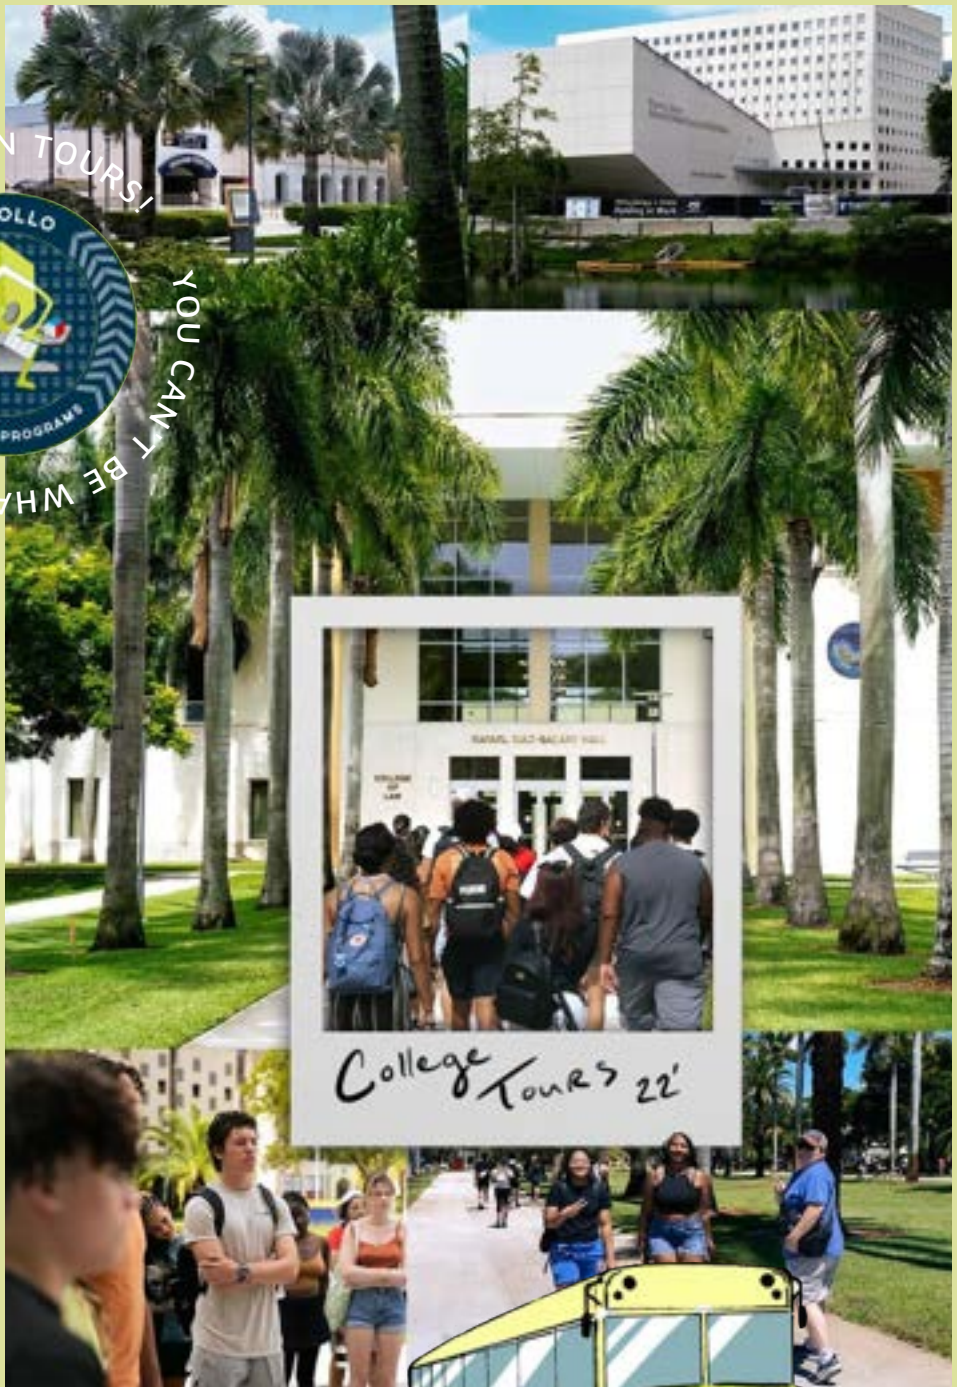

SUMMER PROGRAMS

YOU CAN'T SEE, JOIN US ON TOURS!
YOU CAN'T BE WHAT YOU CAN'T SEE, JOIN US ON TOURS!

ATTOLLO GAMES

Weekly challenges where teams of scholars and staff will go head to head to test their physical, intellectual, and creative muscles. Breakfast is provided in the office afterward (right before Unblocked).

A-FIT

Tread House isn't a fitness trend. Backed by science, Tread House is the perfect combination of cardio and strength. Get lost in the music and challenge yourself by going off of how you feel in the moment as opposed to relying on a device. Allow yourself 60 minutes of connection to your mind, body and soul.

WELCOME TO UNBLOCKED!

WHAT IS A PERSONAL STATEMENT?

Unblocked

The hardest part of writing is getting started. That's where Unblocked comes in. Scholars will engage in self-reflective activities and learn to tell their stories in an empowering way. They will use these skills and individual and group mentorship to write their college personal statements. By the end of the summer, the goal is to have a solid first draft completed.

8-Count

Every week, scholars will learn about commercial choreography concepts aimed at increasing body awareness, musicality, and confidence through dance!

College Tours

We believe it's hard to be what you cannot see and because of this, we wish to provide our Scholars with in-person exposure. Attollo college tours are an immersive experience for our Scholars where we visit several locations nationwide to different colleges and universities over the span of 3-5 days.

ATTOLLO SENIORS

SENIOR SUNRISE
ACE'S RETREAT
ATTOLLO FIRST GEN

Activate Cultivate Elevate

Senior Year

Kicking off the year with Senior Sunrise, students have access to programs that focus heavily on college career readiness through programs like ACE's retreat, First Gen and one on one Advising

*We are not afraid
to step foot on our
dream campuses*

FAFSA TIPS

Both you and your parents should document your FAFSA passwords since you will have two different accounts and will need them for all 4 years of college

During their senior year, scholars participate in workshops during Senior Sunrise to focus on each step of the college application process. Programming includes college-list creation, FAFSA nights, and early application workshops. After applying to their college list schools, scholars may also participate in programs related to the college-experience such as the ACE Retreat (Activate, Cultivate, Elevate) and Attollo First-Gen.

Attollo First Gen is a cohort of students who identify as the first in their family (not including siblings) to go to a four-year institution. Programming includes networking opportunities, student panels, and college readiness. Programs will occur throughout the academic year.

ACE's Retreat

Attollo ACEs is a weekend retreat that focuses on college-readiness and professional/personal development. ACEs will entail workshops regarding topics such as student life, mental health and financial/academic success. ACEs seeks to bring in young professionals and college students to attend panel discussions, providing first hand experiences to our scholars. ACEs seniors will ultimately gain skills that will provide them with the opportunity to do an internship or shadowship with a local company for the remainder of their senior year.

PROGRAM HIGHLIGHT

SDC

The Student Diplomacy Corps (SDC) creates opportunities for underserved high school students from across the nation to access dynamic international education summer programs that build college readiness, deepen empathy and unleash the potential of youth. This year, 9 students were selected to participate summer experiences both domestically and abroad.

NHI

The National Hispanic Institute was founded in 1979 and annually serves between 2,000-2,500 students. To date, NHI has served over 100,000 students and works with 80 colleges and universities. NHI's mission is to create experiences that engage achieving high school and college age youth in community leadership roles that advance our quality of life. This year, 7 ATTOLLO scholars participated in a weekend long retreat at St.Mary's College.

NEW PROGRAMS

ATTOLLO PODCAST

We will bring you behind the scenes conversations through our newest podcast series for a better understanding of our values and what we do. Stay tuned on Spotify for Attollo Podcast!

CREATIVE WRITING

For Spring programs, we will be adding a creative writing course to the books. Students will learn to write properly for academic and professional settings while also developing a habit of writing for fun!
